# W06-P2: Deploy React to Vercel, show route /supabase\_xx

The screenshot shows a Mac desktop environment with several windows open:

- Code Editor:** An IDE window showing the file `BlogsSupabaePage_26.js`. A red box highlights the following code block:

```
const fetchBlogDataFromSupabae = async() => {
  try {
    let { data, error } = await supabae.from('card_26').select('*');

    console.log('data', data);
    setData(data);
  }catch(error) {
    console.log(error);
  }
}
```
- Browser:** A Chrome window displaying the local development server at `localhost:3000/supabae_26`. The page title is "Fetch Blogs From Node Server". It shows a heading "Huang Wei Yi 210410626" and two cards:
  - LIFESTYLE**  
Seven Reasons Why Coffee Is Awesome  
[Read More](#)
  - LIFESTYLE**  
Rocks Of Queen Head In Yehliu Taiwan  
[Read More](#)
- Developer Tools:** The Chrome DevTools Dev panel is open, showing the Network tab with a request to `/supabae_26`. A red box highlights the response body, which contains an array of blog posts:

```
[{"id": 1, "title": "seven reasons why coffee is aw"}, {"id": 9, "title": "rocks of queen head in Yehliu"}, {"id": 8, "title": "serene lake with trees", "descr"}, {"id": 7, "title": "sun rise from the mountain", "d"}, {"id": 6, "title": "101 tower in Taipei", "descri"}, {"id": 5, "title": "coffee make you calm", "descri"}, {"id": 4, "title": "coffee make you feel good", "de"}, {"id": 3, "title": "coffee brings friendship", "des"}, {"id": 2, "title": "travel to paris", "descri": "Lo"}]
```
- System Tray:** Shows various application icons including Finder, Mail, Safari, and others.

The screenshot shows the Vercel deployment interface and the resulting deployed application:

- Vercel Deployment Interface:** A window titled "1112-client-2n-card-demo-26". It shows deployment details for three environments:
  - Production (Current):** Status "Ready", last updated 14s ago, with a "Production Rebuild" button.
  - Production:** Status "Ready", last updated 27s ago, with a "main" branch badge.
  - Production:** Status "Ready", last updated 25s ago, with a "main" branch badge.
- Deployed Application:** A browser window showing the deployed application at `1112-client-2n-card-demo-26.vercel.app/supabae_26`. The page title is "Fetch Blogs From Supabae". It displays the same two cards as the local development server:
  - LIFESTYLE**  
Seven Reasons Why Coffee Is Awesome  
[Read More](#)
  - LIFESTYLE**  
Rocks Of Queen Head In Yehliu Taiwan  
[Read More](#)
- System Tray:** Shows various application icons including Finder, Mail, Safari, and others.

The screenshot shows two browser windows side-by-side. The left window is a GitHub repository page for 'WeiYiHuangfelix/1112-client-2n-card-demo-26'. The right window is a Vercel project settings page for the same repository.

**GitHub Repository (Left):**

- Repository: WeiYiHuangfelix/1112-client-2n-card-demo-26
- Code tab selected.
- Branch: main
- Commits: 2 commits (8e34a5a, 1 hour ago)
- Files listed:
  - .gitignore (w05 end, 5 days ago)
  - README.md (w05 end, 5 days ago)
  - package-lock.json (W06-P2: Deploy React to Vercel, show rou..., 1 hour ago)
  - package.json (W06-P2: Deploy React to Vercel, show rou..., 1 hour ago)

**Vercel Project Settings (Right):**

- Project tab selected.
- Environment section:
  - Production checkbox (unchecked)
  - Preview checkbox (unchecked) - Select custom branch
  - Development checkbox (unchecked)
- Import button (TIP: Paste a .env above to populate the form) and Save button.
- Automatically expose System Environment Variables checkbox (checked).
- Environment variables listed:
  - REACT\_APP\_SUPERBASE\_ANON\_... (Development, Preview, Product..., 1h ago)
  - REACT\_APP\_SUPERBASE\_URL (Development, Preview, Product..., 1h ago)
- Search bar, All Environments dropdown, and Last Updated dropdown.
